

Talkspace Scale Projections

Current: "100 accounts posting at full-scale 4x per day"

- Views: 8.9M
 - 100 accounts posting 1x per day = 2.225M per month
- Spend: \$8,910 x5 = \$44,550
- Actual: 264 Accounts // Contracted: 100 Accounts
- Actual: 418 Posts per day (2x per acct) // Contracted: 4x per acct

Proposal:

5x the Audience reach of the campaign. 5 Audience Niches, each have 100 accounts posting 1-2x per day = ~11.125M views per month (2.225M per niche per month) after Month 1, driving ~2,500 downloads per month to start. At maximum capacity for these 5 audiences, we project ~5,000 downloads per month.

1. Postpartum
2. Couples
3. Veterans
4. Overwhelmed Parent
5. Burnt-Out Adult

We will test each niche for 2 months, at the end of the two months we will 1) Do an audience analysis and report 2) Scale winning users 3) Remove niches that aren't working

Timeline:

Today (June 12): Scaling conversation, align on path forward and send along new contract with updated campaign

June 17: Start warming 400 new accounts for 2 weeks and create new content for each new audience. Accounts will scroll in the niches that we are trying to target

July 1: Start posting across all new accounts (1x per day per account for rest of month)

July 1-15: Constantly tracking and iterating on content to optimize accounts

July 31: Scale posting to 2-3x per day per account

August 15: Run sophisticated audience analysis and produce attribution metrics by end of month

August 31: Determine which audiences to scale / remove + suggest any additional testing
